

Peatland Programme

OUR VISION

The IUCN UK Peatland Programme has a vision for healthy, wildlife-rich peatlands in the UK that provide multiple benefits for people.

OUR GOALS	WHAT WE WANT TO ACHIEVE	HOW WE WILL GET THERE
<p><u>VALUED PEATLANDS</u></p>	<p>The value of our peatlands is better understood and prioritised for restoration and conservation.</p>	<p>We will provide a clear strategy so that everyone can work together towards healthy and protected UK peatlands that deliver for all society.</p> <p>We will advocate for funding from both public and private sectors to support peatland restoration and sustainable management.</p> <p>We will engage with public audiences to increase awareness of the carbon, water and biodiversity benefits provided by peatlands to build support for their good management and reduce use of peat-based compost.</p>
<p><u>STRONG PARTNERSHIPS</u></p>	<p>Bring together scientists, practitioners, land managers and policy makers and all those who can help to deliver strategic peatland goals.</p>	<p>We will nurture strong partnerships between scientists, peatland practitioners, environmental charities, land managers and policy makers to build scientific and practical knowledge of peatlands and their management.</p> <p>We will build links with businesses to increase awareness of the societal benefits provided by peatlands and broaden support for their restoration and good management.</p>
<p><u>ACTION THROUGH KNOWLEDGE EXCHANGE</u></p>	<p>Provide guidance and promote good practice for peatland management that is underpinned by scientific consensus and monitoring, and is responsive to new evidence.</p>	<p>We will develop good practice management guidance.</p> <p>We will showcase UK restoration to better inform good practice and create discussion.</p> <p>We will provide policy advice based on scientific consensus.</p> <p>We will share scientific evidence with an international community of scientists and practitioners to help further develop understanding.</p>

Peatland Programme

The International Union for the Conservation of Nature (IUCN) UK Peatland Programme exists to promote peatland restoration in the UK and advocates the multiple benefits of peatlands through partnerships, strong science, sound policy and effective practice.
